

Model One

Old School Amps™

— Hand Crafted Guitar Amplifier —

Product Overview:

- Single-ended "Class A" operation. 6 watts @ 8 Ohms.
- Low-Noise "tweed" style circuitry using hand-crafted Garolite Eyelet Board and Point to Point wiring.
- Solid construction featuring a steel chassis and Laser-Etched front and rear panels.
- Heavy duty power transformer and air-gapped output transformer for great tone and sustain.
- High/Low Inputs, Volume, Tone, Master Volume and Feedback Switch.
- JJ tubes standard. (Optional -NOS American tubes).
- Quality US-made capacitors.
- Modern 3-Prong grounding system with Standby switch.
- Standard Cabinets are A-1 9 Ply Birch plywood with Black Tolex Finish.
- Great sounding, Hand-Crafted Radiata Pine cabinets are available! (see the picture of a Model One Amp in Pine, at right).
- 5 Year Limited Warranty

Have you always wanted that prized vintage amplifier sound, heard on many rock and blues recordings, but don't want to pay collectors prices? Now you can get it!

The Model One Amplifier is derived from the classic circuitry used by the great amp companies of the 1950's but with modern safety and transformer improvements.

The Model One has that great vintage tone and "swirl" that is missing in the mass-produced amplifiers now available.

Although only 6 watts, this amp is very loud and is great for recording, jamming and can be mic'ed for live performances.
